Data Privacy & Confidentiality Declaration

Guarantee of Local On-Premise Data Isolation for Automotive IP

Data Protection Commitment

Automotive High-Level Design (HLD) documents represent sensitive, proprietary intellectual property. To guarantee absolute confidentiality:

1. Local Processing Pipeline: PDF parsing, text extraction, semantic chunking, embedding generation, vector storage, and inference run entirely within the host machine.

2. No Third-Party Egress: No telemetry, document text, vector embeddings, or prompt logs are exported or shared externally.

3. Demonstration Benchmark: The evaluation dataset ('Sample_AUTOSAR_HLD.pdf') contains purely synthetic, illustrative engineering data created specifically for technical demonstration purposes.

Information Security Verification

Information Security Status: Fully Compliant (Local-Only Architecture)
Date: October 15, 2026
